PROFILE SUMMARY

Computer Science graduate with hands-on experience in backend development, system automation, and cross-functional collaboration in Agile environments. Proven ability to lead projects, optimize processes, and deliver scalable solutions that improve operational efficiency. Passionate about leveraging technology and data to drive business impact in dynamic environments.

EDUCATION

BINUS University – Major School of Computer Science

2022 – 2026

GPA: 3.78

SMAN 2 Jakarta – Major IPA

2019 – 2022

WORK EXPERIENCE

Application Developer – IT Development Digital Intern

2025 – 2026

PT Asuransi Astra Buana

- Enhanced internal Vendor Management System (Laravel, MySQL) as a Fullstack Developer by developing features and improving workflows, increasing efficiency of vendor and administrative operations.
- Developed RESTful APIs for MyGarda x Medcare (C#/.NET, SQL Server, PostgreSQL) to support mobile integration and user-facing services.
- Built automation and scheduler services to streamline data processing and reduce manual operational workload.
- Collaborated in a Scrum-based environment with Business Analysts and QA to deliver solutions aligned with business needs.
- Improved system reliability through performance optimization, framework updates, and API documentation.

PROJECT EXPERIENCE

E-Commerce Web Development – SiLokal

Position: Project Manager & Front-End Developer

- Led development of an e-commerce platform promoting Indonesian local fashion brands, addressing market gaps in visibility and accessibility for local businesses.
- Translated business ideas into functional features through UI/UX design (Figma) and front-end development (HTML, CSS, JavaScript), ensuring a seamless and user-friendly shopping experience.

Streaming Mobile App Development – Let's Chill

Position: Project Manager & Fullstack Developer

- Led end-to-end development of a movie streaming mobile app, defining features based on user needs and industry trends to deliver an intuitive and engaging user experience.
- Integrated Firebase and API authentication while ensuring seamless performance, demonstrating strong execution in both technical implementation and product design.

RESEARCH & ACADEMIC PROJECTS

- Completed undergraduate thesis titled “**Development of a Face Recognition Model with Anti-Spoofing to Support Human Identification**,” building a face recognition system with anti-spoofing capability.
- Conducted research titled “**Comparing K-Means and DBSCAN Algorithms for Clustering Poverty Levels in Papua Islands**,” presented at ICITDA 2024 and indexed by Scopus IEEE.

ORGANIZATIONAL EXPERIENCE

BNCC – Back-End Developer Member

2022 – 2023

- Developed web-based applications using Laravel framework.

Data Science Club – Creative Division Member

2023

- Collaborated with teams to provide informative and good quality contents for Data Science Club social media.

VOLUNTEER EXPERIENCE

BINUS University – Teach For Indonesia

2022 – 2023

- Volunteer Socialization about Anti-Corruption Awareness of Youth for the Future of the Nation at SMA 32 Jakarta.
- Volunteer Socialization about Poverty as a Global Issue at Windsor Homeschooling High School.
- Volunteer Socialization about the Relationship between Religion and Ethics in the School Environment at SMA Sekolah Kemurnian II.
